

Bloom Engineering Seminar

Combustion System Design and Application to Industrial Furnaces
October 23-24, 2024 | Hotel Safi Valle • Av. Diego Rivera 555, Valle Oriente • San Pedro Garza Garcia, N.L

Who Should Attend?

- Plant Managers
- Technology Directors
- Group Leaders
- Plant Engineers
- Persons responsible for the operation, design selection and/or maintenance of fuel fired industrial process furnaces and ovens.

Topics will include:

- Fundamentals of Combustion
- Industrial Burners
- Burner Turndown
- Combustion Systems Emissions
- Typical Burner System
- Furnace Controls
- Heat Transfer Mechanisms
- Heat Recovery Systems
- Components
- Combustion Safety
- Troubleshooting

The Combustion System Design and Application to Industrial Furnaces Seminar is a 2 day event offering attendees the chance to learn the latest in combustion technology and how to apply this technology to the design, operation, and maintenance of industrial furnaces.

Enrollment is limited and registrants will be accepted on a first-come, first served basis.

What Will Be Presented:

Topics presented cover the fundamentals of combustion, energy savings/management, optimizing heat transfer, and combustion safety code requirements. In addition, system design, component function, practical sections on system start up, refractory design options, auxiliary equipment for productivity/energy optimization, and emission management will also be on the schedule.

Registration:
\$1,000 USD per Registrant

The registration fee includes:

- Tuition
- All seminar materials
- Luncheon
- Refreshment breaks

Note: Hotel accommodations are **not** included in the registration fee.
